

There is no “Planet B.”

We only have one Earth.

We only get one chance.

We need to keep in mind the nature of our larger problem....

UN warns on soaring food prices

The soaring cost of food is threatening millions of people in poor countries, the United Nations Food and Agriculture Organisation (FAO) has warned.

Food prices have risen an unprecedented 40% in the last year and many nations may be unable to cope, the agency says.

It is calling for help for farmers in poor countries to buy seeds and fertiliser, and for a review of the impact of bio-fuels on food production.

The FAO says 37 countries face food crises due to conflict and disaster.

Droughts have affected harvests, pushing prices up

Global hunger worsening, warns UN

Targets to cut the number of hungry people in the world will not be met without greater international effort, UN food agencies have warned.

The UN's annual report on global food security confirms that more than one billion people - a sixth of the world's population - are undernourished.

It says the number of hungry people was growing before the economic crisis, which has made the situation worse.

The report comes ahead of World Food Day on Friday.

"No nation is immune and, as usual, it is the poorest countries and the poorest people that are suffering the most," said the annual

Targets to cut hungry people not be met by international agencies have

The UN's annual food security report says that more than one billion people in the world's poorest countries are undernourished.

It says the number of people who are hungry has increased and the situation is worsening.

The report calls for more aid to help the world's poorest people.

"No nation is doing enough to help the poorest people," it says.

As US and Other Wealthy Nations Slash Aid, UN Warns of "Silent Tsunami of Hunger" in Global Food Crisis

The UN World Food Program is calling the current global food crisis "a silent tsunami of hunger." This week the WFP warned that more than 40 million people will have their food rations reduced or eliminated because of drastic aid cuts. We speak with award-winning Indian journalist, writer and activist Devinder Sharma. [includes rush transcript]

Got a Carbon Problem? Fix it !

Part 1 – Some Prophetic & Enduring Testimony

23 June 1988

14 September 1988

For decades some ecological anthropologists have warned that civilizations which abuse their topsoil, groundwater and biodiversity soon collapse.

Got a Carbon Problem? Fix it !

Part 3 – Growing Soil to Save the Human Prospect

Sustainability vs Ecological "Overshoot" & Collapse

Current petroleum-intensive agriculture mines and degenerates the soil. To live sustainably in Earth's ecosystem we must convert to a regenerative agriculture *to build* soils, not destroy them.

<https://environmentaljusticetv.wordpress.com/2016/05/22/ev-n-216-cctv-got-a-carbon-problem-fix-it-part-1-s-ome-prophetic-enduring-testimony/>

Tim Weiskel - 27

Got a Carbon Problem? Fix it !

Part 2 – Global Crisis & Localized Responses

permanent + agriculture

Sunlight + water + soil => produce => plants for us to live. To survive in the future we need to learn to grow -- not destroy -- topsoil. Tim Weiskel - 28

Anna Lappé has taken this message globally, addressing the food crisis on the horizon from climate change.

<https://environmentaljusticetv.wordpress.com/2012/11/17/food-mythbusters-do-we-really-need-industrial-agriculture-to-feed-the-world-2/>

Soils grow food.... Humankind must now
learn to *grow soil* with sustainable
permaculture practices

Restorative Development: Sustainable Agriculture and the Climate Crisis

Professor William Moomaw

With the carbon sequestration techniques of soil building that emerges from sustainable agriculture we can address climate change.
